

Manufacturer's declaration on RoHS – REACH – POP

NetterVibration hereby declares that, to the best of our knowledge, the products we deliver are in conformity with the latest versions of the following directives and regulations of the European Union:

- 2011/65/EU (**RoHS 3** Directive)
- 2015/863/EU Amendment of Annex II of the RoHS Directive 2011/65/EU
- Regulation (EU) No. 1907/2006 (**REACH and SVHC**)
- 2019/1021/EU (**POP** Regulation)

NetterVibration ensures the flow of information within the supply chain. **NetterVibration** has no obligations arising from the registration or notification of substances and preparations.

Through a systematic approach, we verify compliance with applicable regulations and legal requirements. An internal team assesses the products and components for risk factors. Based on this assessment, the supplied parts are cyclically checked for compliance with substance prohibitions and declaration obligations. Our suppliers undertake to comply with substance prohibitions and declaration obligations in accordance with the Directives/Regulations mentioned.

In this context, we regularly ask our upstream suppliers to provide us with the relevant information regarding RoHS, REACH and POP. According to current knowledge, the products do not contain any substance on the candidate list.

For all products that contain substances of very high concern according to the candidate list with > 0.1 percent by mass, there is an obligation under REACH Article 33 to provide information within the supply chain.

Please do not hesitate to contact us if you have any questions or uncertainties.

We look forward to a continued trustful and good cooperation.

With kind regards

NetterVibration
